***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: applicant's amendments and argument are deemed to place the application in condition for allowance. In particular, claim 1 has been amended to recite that the motion sensor is located in the handle and is capable of detecting the movement of the pencil in free space. As argued by the applicant, Buchman and Lebouitz both require the sensor to be located on the electrode blade and are capable of detecting movement only when the blade is in contact with tissue. The examiner had cited the Altschuler et al reference as a teaching of providing the motion sensor in the handpiece. However, as argued by applicant, Altschuler et al provide the sensor on the handpiece but fail to provide an RF element extending from the handpiece. Rather, Altschuler et al detect motion of the handpiece as it is moved across tissue, similar to Buchman and Lebouitz, and do not teach a device capable of monitoring movement in free space. Newly added independent claims 15 and 20 both recite the motion sensor (i.e. accelerometer) located in a handle portion of the pencil device, and the prior art fails to disclose such a location for a motion sensor on an electrosurgical pencil device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
